

mysafety.net is for people who work alone, away from an office or without supervision.

Essentially it is a free online buddy system for use by lone workers who want to link with colleagues to improve their personal safety and to share information about risks. The website allows colleagues to create communities, flag risks specific to certain locations and points of interest relevant to the job role(s) being carried out.

mysafety.net is free, so sign-up and start connecting with buddies today. www.mysafety.net

Free to use features of mysafety.net:

Itinerary

Share your schedule and keep your safety buddies up to date.

Keep your buddies and community informed of activities being carried out. See the schedules of colleagues you are connected to and share & receive information between you and nominated safety buddies to help keep members of your community safe.

Buddy with Colleagues

Create a secure community with friends/colleagues and share risk data.

Linking with buddies as part of a community allows you to create an information flow with anyone you are connected to. Linked buddies can help keep each other safe.

Email Alerts

Set up automatic emails to your safety buddies. Automate your peer-to-peer buddy system.

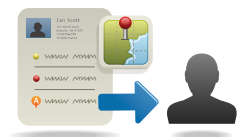

Send & receive automatic email alerts that help ensure all lone workers are safe and accounted for in line with their itinerary. If alerts are not responded to, then further information is automatically sent to users and their nominated safety buddies for further escalation.

Risks & Newsfeed

Get regular updates about crime, traffic, mobile network outages, & specific risks to where you work.

View a newsfeed for your activities, and those of your buddies. See locations, and risk types identified. Get updated quickly and effectively.

Map your Risks

Tag & Flag POI's. Risks, and information about the places you visit – share with your community.

Utilising Google Maps, mysafety.net allows a user to plot areas of risk or general points of interest for use by those in a given network or community.

Want the Premium version for free?

Whilst mysafety.net is a free buddy system to aid communication with colleagues, some may wish to increase the power of the application by upgrading to the premium version with access to increased functionality and flexibility.

Premium functions available are explained in more detail overleaf – it's worth noting that any company with a  SoloProtect lone worker solution can access these functions for free for the full duration of their contract.

Premium options:

Link Communities
Share risk information with other like minded, local communities.

More information = better risk assessments. Increase your communication network by expanding your community base to include more members whilst also linking to other relevant communities. Share information common to industries, locations or job roles to increase the power of mysafety.net.

Live Data
Dynamic risk updates, community feeds.

Let the system update you whilst on the move during the day as new information comes to hand. Get in touch with buddies even quicker with a range of options.

Uncapped
Unlimited buddies, community to community linking.

Connect with an unlimited number of buddies and keep them in the loop on activities. Appoint a range of colleagues to respond to alerts if you aren't able to update your status. If your community is larger than 5 members, then this option allows the whole team to connect.

Pricing for Premium usage:

To link to an unlimited number of buddies or to link community to community you will need to upgrade to the premium version of mysafety.net

Upgrading to premium can cost from £1.80 per community member per month. Upgrading requires you to purchase credits, which are available from as little as £0.09 per credit. Credits are needed to sustain a monthly premium community subscription (i.e. a community with links to other communities incorporating users that have unlimited risk networking and buddy linking capacity) and can be purchased in bundles (Minimum # of credits purchased in a bundle is 100). The more credits you buy in a bundle, the better the value.

All premium features are linked to a community as opposed to an individual user, therefore each community owner is responsible for arranging credit purchasing on behalf of all those in the community. The community owner is usually the person who first creates the community but ownership can be transferred to another member at any time.

If you would like to discuss the creation of a premium account, request more information about the premium features available on mysafety.net or to receive a quotation please e-mail info@mysafety.net for more information. Alternatively you can sign in to mysafety.net and upgrade to premium online through the 'Community' link under 'Account & Settings'.

Credits required:

Upgrade a Community to Premium: **100 Credits per month**

Includes: Up to 5 User Memberships.

Notes: The monthly subscription will be deducted on the monthly anniversary of your upgrade date.

Additional Memberships: **20 Credits per month**

Includes: User membership to your community for a month.

Notes: Prorated in the first month, then deducted on the Community anniversary date.

Credit bundles:

Credits	Price
100	£15.00 (£0.15/credit)
500	£67.50 (£0.14/credit)
2,000	£240.00 (£0.12/credit)
6,000	£630.00 (£0.10/credit)
12,000	£1080.00 (£0.09/credit)
